Essay SS-6

Hello, I'm Desi Shofiana Sari from Ecorish, a sharing food mobile application that can detect the type of food.

Did you know that in Indonesia, food waste had reached to 46 million tons by 2021? And not only that, our country have a level of hunger in third place in the Southeast Asia Global Hunger Index 2021.

So, we bring this Ecorish to society and help users to reduce a food waste

and level of hunger. Also, with machine learning system, our application will detect the type of food and describe to users that type. In this way it will provide food that is cheaper than others. For the application, my team has a prototype. And we looking for angel investor for our application. In short, doesn't this app concern you enough?
